basin specifications

ENGINEERED FOR DURABILITY

Oras single lever mixer ceramic disc cartridge
with brass spindle

ACCESSIBLE LEVER OPTION

AERATOR OPTIONS

5 Star - Installed

3 Star - Supplied in Carton

5 Star Laminar - Order MK5LF

Thoughtful Design

“The synergy between style and function.” *Enware R & D Manager*

We've been listening to the stories of many people who are impacted by various dexterity challenges and to those who simply want more comfort and control when it comes to single lever mixers. These stories became the inspiration for the design thinking approach for the Safira mixer range.

It is with this in mind, Enware-Oras have designed a feature into the handle that allows

the thumb to comfortably rest on top with your hand underneath to assist with controlling movement and adjusting the handle to the right position.

Safira captures contemporary style and quality engineering – built for the rigours of daily use and diversity of user groups across many industries.

Thoughtful design, the synergy between style and function is at the heart of everything we do, now and into the future.

Education

Most people make the mistake of thinking design is what it looks like. People think it's this veneer – that the designers are handed this box and told, “make it look good!”.

That's not what we think design is. It's not just what it looks like and feels like.

Design is how it works.” Steve Jobs
